### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Oshima et al (6266299).

The independent claims are merely drawn to using the disk ID in addition to the well established water mark in protecting the disk content. The admitted prior art (figs 1-3) disclose the use of an optical disk DVD recording and reproducing apparatus wherein the disk having copy attribute embedded as a water mark thereon. However, the admitted prior art does not disclose the use of a disk ID in conjunction with the water mark in protecting the data content. The secondary reference disclose the use of a water mark in addition to the disk ID in protecting the data on the disk for the purpose of preventing illegal disk duplication as shown in fig s 32 and 41 showing the water make and comparing the disk ID stored into a data base in protecting the data content.

It would have been obvious to one skilled in the art at the time the invention was made to use the teachings of the secondary reference and modify the system of the prior art. Such modification of using the disk ID is merely an engineering capability for the purpose of adding another layer of data disk security. Thus it would have been obvious to one skilled in the art at the time the invention was made to use the teachings of eh secondary reference for the purpose of preventing and securing data duplication from one medium to another.

Art Unit: 2655

With respect to the limitations of the dependent claims see fig 19 showing the BCA having the manufacturer data.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 13 is rejected under 35 U.S.C. 102(e) as being anticipated by Nishizawa (6279959).

The reference shows an optical disk having a watermark thereon and a disk ID (serial number) meeting the claimed invention as shown in fig s 6 and 7.
